Terminal Disclaimer

1. The terminal disclaimer filed on 3-30-2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. patent application, serial number 09/847,658, now allowed, has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with M. Robert Kestenbaum (reg. No. 20,430) on May 13, 2004.

The application has been amended as follows:

In claim 7, at line 1, the phrase "according to claim 5" was changed to
---according to claim 8---

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of a projection objective having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of

Art Unit: 2873

claimed elements and claimed limitations, including the reasons for allowance given in the office action mailed on 9-30-03, as well as the terminal disclaimer filed on 3-30-

2004, with respect to claims 7-10, 19 and 28, specifically. Therefore, in light of the Applicants' arguments and/or amendments, as well as the terminal disclaimer, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Specification

4. The substitute specification has been received and entered into the application. Though the data table pages filed with the substitute specification were not evident in the application as filed, the original transmittal form filed with the application clearly accounts for the 14 pages of tables. Further, the foreign priority document has the same tables, so the tables were intended to be included in the application. It should be noted that this application was originally filed in paper form, and was subsequently scanned into an image file on the new electronic system, eDan, at the Patent and Trademark Office. This could account for the data tables not evident in the application, as it appears in eDan.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evelyn A. Lester whose telephone number is (571) 272-2332. The examiner can normally be reached on M- F, from about 10 am to 7 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
